

# BattleMech Manual

(Version 1.3)

The following is a compiled rules errata for the first printing of the *BattleMech Manual* as of 9 December, 2017.

## FULL ERRATA

This section combines all previously issued errata with the new additions of version 1.3, so that every ruling is in order and in one place. Entries new to version 1.3 are marked with a ③.

All errata here is for the first and only printing (2017) of the *BattleMech Manual*. Please note that, in the interests of brevity, typo and minor formatting corrections have not been listed unless they affect an understanding of the rules.

### Table of Contents (p. 2)

- 1) Bottom left corner, under "Movement Basics": delete the "Level Change" and "Stacked Terrain" entries.
- 2) Under "Other Actions", change the page reference for "Falling Damage to a 'Mech" to p. 57
- 3) Under "Other Actions", change the page reference for "Damaging a MechWarrior" to p. 58

### Terrain Hex Icons (p. 7)

Under "Water", change the page reference from p. 16 to p. 15.

### Walking (p. 13)

Under "Triple-Strength Myomer", change the page reference from p. 115 to p. 117.

### Running (p. 14)

- 1) Under "MASC", change the page reference from p. 115 to p. 116.
- 2) Under "Supercharger", change the page reference from p. 115 to p. 116.

### Prone BattleMechs (p. 19)

Under "Minimum Movement", change the page reference from p. 18 to p. 16.

### Movement in Water (p. 19)

In the first paragraph, change the page reference from p. 16 to p. 15.

### Movement in Water (p. 20)

In the first paragraph on the page, change the page reference for "Minimum Movement" from p. 18 to p. 16.

### Lifting Items (p. 21)

In the first paragraph, change the page reference for "Triple-Strength Myomer" from p. 115 to p. 117.

### TAG Designation (p. 21)

Change the page reference for "TAG" from p. 112 to p. 113.

### Range Modifier (p. 27)

*Under "Levels", second sentence*

A target one hex away but 99 levels higher than the attacker is still one hex away when determining range and range modifiers.

Change to:

A target one hex away but 99 levels higher than the attacker is still one hex away when determining range and range modifiers (unless both the attacker and target are within a building; see *Combat Within Buildings*, p. 72).

### ③ Indirect Fire (p. 31)

Under "TAG", at the end of the paragraph insert the following new paragraph:

Note that spotting a target for indirect fire via TAG does not apply any of the special Target Number modifiers listed under the final bullet point above.

### Attack Direction (p. 32)

Replace the second paragraph with the following:

Use the *Line of Sight* rules (see p. 22) to determine which hexside is crossed when determining attack direction. If the LOS crosses exactly between two hexsides, the hex picked when LOS was determined must be used here as well.

### ③ Falls After DFA (p. 37)

Replace the second paragraph with the following:

On an unsuccessful attack the attacker automatically falls, taking damage as though it had fallen 2 levels. Roll on the Facing After Fall Table to determine facing (see p. 57), but the Hit Location for this damage is always the rear.

### Damage Resolution Flow Chart (p. 42)

There are several errors here. The all-text version of this on the previous page is correct; for correct visuals, download the refreshed copy of the page, available separately on the *BattleTech* Errata webpage.

### ② Leg Destruction (p. 45)

Replace the top-left first two paragraphs with the following paragraph:

A 'Mech that loses both of its legs automatically falls as well. It is not considered immobile (see p. 16), but it has 0 MP available. It cannot change hexsides or attempt to stand, though it can still attempt to prop itself up to fire if it has both arms.

### Critical Hits (p. 45)

Under "Through-Armor Critical Hits", at the end of the entry insert the following paragraph:

If a TAC hit is scored on an already-destroyed left or right torso, the chance for a TAC transfers to the center torso along with the damage.

### Hand Actuator (p. 48)

Under "Missing Actuators", replace the entry with the following:

Some 'Mechs are designed without one or both hand actuators. The Target Number modifier for punch attacks given above still applies to such 'Mechs (i.e. whether the actuator is destroyed or merely absent is irrelevant in this case).

### Shutdown (p. 52)

Under "Voluntary Shutdown", last sentence

They may then restart the power plant in any subsequent End Phase, provided they first pass any Shutdown Avoid checks due to heat (if needed), and provided there is no damage (such as three or more Engine Shielding criticals) that prevents a restart.

Change to:

They may then restart the power plant in any subsequent End Phase, provided they first pass any Shutdown Avoid checks due to heat (if needed).

### ② Falling Damage to a MechWarrior (p. 57)

Replace the "Automatic Damage" paragraph with the following:

A MechWarrior automatically takes 1 point of damage if at the time of the fall their 'Mech is immobile (see p. 27) or if the modified Target Number for the PSR to avoid MechWarrior damage is greater than 12.

### ② Damaging a MechWarrior (p. 58)

Under "Falling", replace the second paragraph with the following:

If the 'Mech is immobile (see p. 27), or if the modified Target Number for the PSR to avoid MechWarrior damage is greater than 12, such a fall automatically damages the warrior.

### ③ Light (p. 62)

Fourth paragraph, second sentence

A searchlight is presumed to be aiming at ground level, but a player may specify any level from 1 to 29.

Change to:

A searchlight is presumed to be aiming at ground level, but a player may specify any level from 1 to 29 at, above, or below the level the 'Mech is in (and within LOS).

### Basements (p. 66)

Second paragraph, first sentence

A 'Mech automatically falls through the floor into a basement if the combined tonnage of all 'Mechs located on Level 0 is greater than the building hex's CF at the start of the current Movement Phase.

Change to:

A 'Mech automatically falls through the floor into a basement if it is on Level 0 and its tonnage is greater than the building hex's CF at the start of the current Movement Phase.

### Moving Into Buildings (p. 67)

Under "Collapse", first sentence

If the total tonnage of 'Mechs on any single level of a building hex exceeds the hex's current CF

Change to:

If a 'Mech's tonnage on any single level of a building hex exceeds the hex's current CF

### Attacking 'Mechs Inside Buildings (p. 71)

Replace the first paragraph with the following:

'Mechs inside a building hex may be attacked. An attacker must have line of sight to the building hex, as well as to the target 'Mech (remember that while a 'Mech only occupies one building level, it still rises two levels high for LOS purposes). Building hexes block LOS, but the building hex a 'Mech is in does not count (since it is not intervening terrain).

### Combat Within Buildings (p. 72)

Replace the last bullet point with the following:

- Regardless of the attacker or target 'Mech's level, always use the Front/Rear column of the standard Hit Location Table to resolve any hits (see p. 33), just as with normal combat.

*Errata note: the BattleMech Manual, in the interests of simplicity, does not use the Special Hit Location Table (TW p. 175) to resolve hits by 'Mechs against each other inside buildings.*

### During Game Play (p. 75)

Under "Damage Value Groupings", second and third sentences

Each Damage Value grouping noted on the Battlefield Support Table consists of 5 damage. For example, the Heavy Bombing has five Damage Value groupings, so it would apply a total 25 points of damage, in five Damage Value groupings of 5 damage each.

Change to:

Each Damage Value grouping noted on the Battlefield Support Table consists of 5 damage. For example, the Heavy Bombing has six Damage Value groupings, so it would apply a total of 30 points of damage, in six Damage Value groupings of 5 damage each.

### Offensive Aerospace Support (p. 76)

Change the Light Strike target number from 4 to 5.

### Radius Diagram (p. 77)

Delete the Radius 3 ring: no weapon under these rules can reach that far.

### Battlefield Support Table (p. 78)

- 1) Change the Light Bombing target number from 6 to 5.
- 2) ③ Change the Copperhead target number from 8 to ‡ and change the Illumination/Smoke target number from ‡ to 8.

### ③ Dropping 'Mechs (p. 80)

*Under "Arrival", third paragraph (second on the page), second sentence*

A successful roll result indicates the 'Mech lands in the target hex at the end of the Movement Phase.

Change to:

A successful roll result indicates the 'Mech lands in the target hex at the end of the Movement Phase with any facing desired.

### ③ Point-Blank Shots (p. 82)

*In between the second and third paragraphs insert the following new paragraph:*

**Forced Withdrawal:** If the damage from a point-blank shot triggers a forced withdrawal and the damaged 'Mech has MP remaining, its forced withdrawal begins immediately.

### Negative Design Quirks (p. 89)

Change the cost for Static Ammo Feed to 1 point (and repeat this correction on the quirk cost summary table on p. 144).

### BattleMech Quirk Table (pp. 90-95)

- 1) Anubis: add Exposed Actuators
- 2) ③ Battle Hawk: remove Bad Reputation
- 3) BattleMaster: remove Jettison-Capable Weapon (PPC), add Weak Head Armor (1)
- 4) Brigand: remove Modular Weapons
- 5) Cobra: replace Barrel Fist (LA/RA) with Protected Actuators
- 6) Grand Crusader: add Directional Torso Mount (LT/RT)
- 7) Valkyrie: add Easy to Maintain

### Weapons and Equipment (p. 96)

*Under "Chapter Contents"*

- 1) Change the page number refs for Structural Components to pp. 114-117
- 2) Change the page number refs for Miscellaneous Equipment to pp. 118-119

### ③ Machine Guns (p. 101)

*Under "Rapid-Fire Mode (Optional)", second paragraph (first after the bullet points):*

Each rapid-fire burst uses a number of rounds equal to the damage it inflicted x 3.

Change to:

Each rapid-fire burst uses a number of rounds equal to the heat generated above x 3.

### ② Streak LRM Launcher (p. 104)

Change "Indirect Fire" from "Yes" to "No".

**Narc Missile Beacon (p. 104)**

Under "Game Rules", second sentence: change the page reference for Narc-equipped missiles from p. 104 to p. 107.

**Flail (p. 109)**

Under "Game Rules", at the end of the entry insert the following:

Flail damage is never reduced by absent or damaged actuators.

**Nemesis Pods (p. 108)**

Right column, first para: change the page reference for Arrow IV Homing Missiles from p. 118 to p. 97.

**② Partial Wing (p. 116)**

Under "Game Rules", second paragraph

The added Jumping MP bonus (+2 for light and medium 'Mechs, +1 for heavy and assault 'Mechs) does not apply if the 'Mech has no functioning jump jets,

Change to:

The added Jumping MP bonus (+2 for light and medium 'Mechs, +1 for heavy and assault 'Mechs) does not apply if the 'Mech has no available Jumping MP,

**③ Underwater Maneuvering Units (UMUs) (p. 117)**

Under "Game Rules", replace the entry with the following:

To use UMUs, a 'Mech must use the jumping movement mode (and counts as jumping when calculating Target Number modifiers). Each UMU generates 1 UMU MP, and a 'Mech may move 1 hex underwater or 1 depth (up or down) for each UMU MP. No move with UMUs can take a 'Mech out of water or move it to a depth of 1 or less. The normal hull breach rules still apply (see *Hull Integrity And Breaches*, p. 65), and if the UMUs are disengaged, all standard rules for moving underwater apply.

UMUs generate only 1 heat point per turn total, regardless of the number of UMU MP used (2 heat total if used with an XXL engine).

A 'Mech using UMUs moves in an upright position and marks its submerged depth based on the location of its feet relative to the water surface. If this is Depth 2, the 'Mech is presumed to be just above the bottom of the hex.

**③ Coolant Pod (p. 119)**

1) Under "Game Rules", at the end of the paragraph insert the following:

Each coolant pod can only be used once per game.

2) Under "Critical Hit", replace the sentence with the following:

A critical hit on an unused coolant pod results in a 10-point ammunition explosion.

**Record Sheets & Tables (p. 142)**

- 1) Battlefield Support Table: under "Heavy Air Cover", delete the "5/6" entry in the Target Number column.
- 2) Battlefield Support Table: change the Light Bombing target number from 6 to 5.

## NEW ADDITIONS

These are all the new entries or modifications of old entries for version 1.3 of this document. They may also be found in the **Full Errata** section in the appropriate locations, marked with a ③.

### ③ Indirect Fire (p. 31)

*Under "TAG", at the end of the paragraph insert the following new paragraph:*

Note that spotting a target for indirect fire via TAG does not apply any of the special Target Number modifiers listed under the final bullet point above.

### ③ Falls After DFA (p. 37)

*Replace the second paragraph with the following:*

On an unsuccessful attack the attacker automatically falls, taking damage as though it had fallen 2 levels. Roll on the Facing After Fall Table to determine facing (see p. 57), but the Hit Location for this damage is always the rear.

### ③ Light (p. 62)

*Fourth paragraph, second sentence*

A searchlight is presumed to be aiming at ground level, but a player may specify any level from 1 to 29.

Change to:

A searchlight is presumed to be aiming at ground level, but a player may specify any level from 1 to 29 at, above, or below the level the 'Mech is in (and within LOS).

### ③ Battlefield Support Table (p. 78)

Change the Copperhead target number from 8 to ‡ and change the Illumination/Smoke target number from ‡ to 8.

### ③ Dropping 'Mechs (p. 80)

*Under "Arrival", third paragraph (second on the page), second sentence*

A successful roll result indicates the 'Mech lands in the target hex at the end of the Movement Phase.

Change to:

A successful roll result indicates the 'Mech lands in the target hex at the end of the Movement Phase with any facing desired.

### ③ Point-Blank Shots (p. 82)

*In between the second and third paragraphs insert the following new paragraph:*

**Forced Withdrawal:** If the damage from a point-blank shot triggers a forced withdrawal and the damaged 'Mech has MP remaining, its forced withdrawal begins immediately.

### ③ BattleMech Quirk Table (p. 90)

Battle Hawk: remove Bad Reputation

### ③ Machine Guns (p. 101)

*Under "Rapid-Fire Mode (Optional)", second paragraph (first after the bullet points):*

Each rapid-fire burst uses a number of rounds equal to the damage it inflicted x 3.

Change to:

Each rapid-fire burst uses a number of rounds equal to the heat generated above x 3.

### ③ Coolant Pod (p. 119)

- 1) *Under "Game Rules", at the end of the paragraph insert the following:*

Each coolant pod can only be used once per game.

- 2) *Under "Critical Hit", replace the sentence with the following:*

A critical hit on an unused coolant pod results in a 10-point ammunition explosion.
